

Continenence, Ostomies & Wounds (C.O.W) Advanced Clinical Program

Description:	This program provides experienced clinicians with the opportunity to enhance their knowledge and skills in the advanced practice management of wounds, stomas and continence in the acute care setting. Sessions include workshops and case studies delivered by subject matter experts that will reflect the experience of the enrolled participants.
Learning objectives:	At the conclusion of this study day, the learner will be able to <ul style="list-style-type: none"> • Demonstrate advanced practice knowledge related to wound assessment; • Extend existing knowledge related to selecting appropriate wound dressings to promote wound healing; • Demonstrate advanced practice knowledge related to stoma care and the various products available to assist in that care; • Recognise and understand the impact of the complications and issues surrounding continence dysfunction.
What participants say:	'I gained much knowledge from the whole day and have a greater understanding of procedures and how to care for patients more effectively'
Who should attend?	Nurses and health care professionals working in a healthcare service with an existing knowledge base related to continence, ostomies and wounds who would like to extend their knowledge further.
Program drivers:	Training Needs Analysis; Supportive of National Safety & Quality Health Service Standard 5
Program preparation:	Completion of learning activities via online learning (Moodle).
