

Palliative care Clinical Program

Description:	This study day will improve nurses' understanding of palliative care, empower nurses to advocate for their patients and reduce stress associated with caring for patients and their families at difficult times. The program is delivered by medical, nursing and allied health palliative care experts. Learning material will be provided on registration.
Learning objectives:	At the conclusion of this study day, the learner will be able to <ul style="list-style-type: none"> • Identify what palliative care is and when palliative care should become part of the patient care plan • Recognize when patients require complex symptom management (physical and psychosocial) and refer to the appropriate services • Identify and analyse the ethical aspects of a particular scenario in the domain of the palliative patient • Develop strategies that promote effective communication with dying patients and their families
What participants say:	' All presenters were very engaging and all had an obvious passion for what they do which I found extremely inspiring' 'This was a very enjoyable day to learn and reflect'
Who should attend?	Nursing staff interested in understanding how palliative care improves both patients' and their families' quality of life and why using a palliative approach in patient care improves nurses' job satisfaction.
Program drivers:	Training Needs Analysis
Program preparation:	Completion of learning activities via online learning (Moodle).
Facilitator:	Karen Proctor , Clinical Nurse Consultant BApSc Palliative Care SCGH
