

Physical Assessment Clinical Program

Description:	<p>This study day is a blended learning opportunity to develop systematic focused physical assessment (PA) skills related to the respiratory, cardiovascular, neurological and abdominal body systems. Sessions include workshops, scenarios, case studies, clinical handover and documentation.</p> <p>It is expected that participants will have a basic knowledge of anatomy and physiology, common pathology/disease and general nursing management related to the body systems. As well as to complete prescribed self-directed learning prior to attending. This will provide basic theoretical knowledge required for interactive activities on the day.</p>
Learning objectives:	<p>At the conclusion of this study day, the learner will:</p> <ul style="list-style-type: none"> • Complete a general systematic A-E assessment • Gain confidence in completing a focused PA; including identifying signs & symptoms and abnormal diagnostic results related to the respiratory, cardiovascular neurological and abdominal body systems • Document essential findings related to the PA system, accurately in the progress notes • Handover using iSoBAR.
